# SMART Board® interactive whiteboard system

Model SB885ix2/SB885ix2-SMP

#### Overview

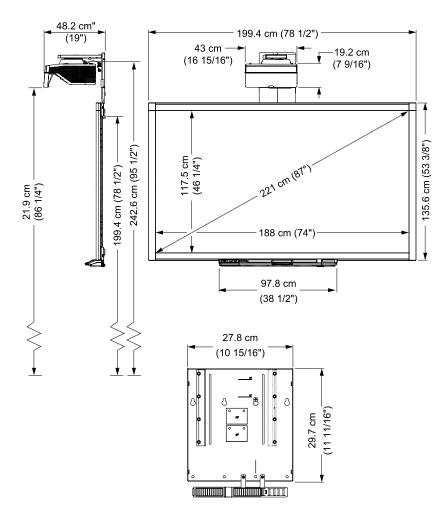

Your SMART Board 800ix2 interactive whiteboard system combines the use of a SMART Board 885 interactive whiteboard, a SMART UX80 projector, and other accessories and optional equipment.

It uses the WXGA (16:10) ultra-short-throw, high-offset SMART UX80 projector and delivers high definition, 3D-ready high performance interactivity that is virtually shadow-free and glare-free. You can do everything you can do at your computer—open and close applications, meet with others, create new documents or edit existing ones, visit websites, play and manipulate video clips and more—just by touching the interactive surface. Four users can draw on the interactive surface at the same time, and you can use an array of gestures within applications.

The projector supports video and audio connections from a variety of devices including DVD and Blu-ray™ players, document cameras, and other high-definition sources, and can project media from these sources onto the interactive screen. All HDMI 1.4 inputs are HDCP compliant.
