Release notes

SMART Table® 3.1 software and SMART Table Toolkit 2.6

About these release notes

These release notes summarize the features of SMART Table® 3.1 software and SMART Table Toolkit 2.6.

Product information

The SMART Table collaborative learning center has a touch-sensitive surface. By touching the surface, students can create, select, move and resize digital objects. More than one student can touch the surface at a time. Using the Wi-Fi® network connection to a teacher computer with SMART Sync™ classroom management software, teachers can observe student activity from a distance, take control of the table and capture and print the tabletop image. SMART Table software includes interactive applications, learning activities and educational games.

You can customize activities using SMART Table Toolkit. Install and run the toolkit on your computer, and then transfer your changes to the SMART Table collaborative learning center using a USB drive or SMART Sync classroom management software. You can use the table with other SMART products, including the SMART Document Camera™ and SMART Notebook™ collaborative learning software.

SMART Table 3.1 software summary

About this release

This release introduces new features to SMART Table software.

Scrapbook is an application that allows students to create scrapbooks with text, ink and images. Add images to the scrapbook by using the SMART Document Camera to capture images, by downloading images from the SMART Exchange™ website or by loading images from a USB drive.

Symphony is an application that enables up to four students to play musical instruments on the table and record a musical composition. Students can choose an instrument to play while reading music notation. Save musical compositions to the table or to a USB drive and play them later or on other devices.

Software component version numbers

Component	Version
Windows® operating systems	
SMART Table software	3.1.1144.0
SMART Table Toolkit	2.6.1144.0
SMART Sync 2011 Student software	10.0.574.0
SMART Notebook software	11.3.857.0
SMART Product Drivers	11.3.533.0
Mac OS X operating system software	
SMART Table Toolkit	2.6.554.0

Computer requirements

There are some changes in the supported Windows operating system and supported Mac operating system software.

Windows computers

Minimum hardware

- Intel® Pentium® III 1 GHz or better processor

- 512 MB of RAM

- USB 2.0 receptacle

- Video card and monitor with XGA (1024 × 768) resolution support

Supported operating systems

> 📝 **N O T E**
>
> SMART Table Toolkit no longer supports Windows Vista®. SMART Table software still supports Windows Vista.

- Windows XP SP3, x86

- Windows 7 SP1 x86

- Windows 7 SP1 x64

- Windows 8 x64

Other requirements

- Administrator privileges

- Internet access

- Up-to-date antivirus utility

Mac computers

Minimum hardware

- Intel Core™ Duo 1.83 GHz or better processor

- 512 MB of RAM

- USB 2.0 receptacle

- Video card and monitor with XGA (1024 × 768) resolution support

Supported operating system software

- Mac OS X 10.7 (Lion)

- Mac OS X 10.8 (Mountain Lion)

Other requirements

- Administrator privileges

- Internet access

- Up-to-date antivirus utility

New features

SMART Table Toolkit
N/A

SMART Table collaborative learning center
- Scrapbook and Symphony applications.

- SMART Table software version and Windows operating system version are available in *About SMART Table* under the *Technical Support* tab.

- The on-screen keyboard now uses the Windows keyboard layout.

- Improved support for native Windows 7 touch applications

Resolved issues

SMART Table Toolkit
- The Online Activity Packs tab loads the SMART Exchange website.

SMART Table software issues
- Search terms for the SMART Exchange website aren't case sensitive.

- SMART Exchange supports search terms for languages that don't use the Roman alphabet.

- When SMART Notebook is rotated, touch now works correctly.

Known issues

SMART Table software issues
- If you're renaming an activity pack and include an underscore in the new file name (for example, sample_1), the underscore isn't visible until you finish renaming the activity pack.

- If you open an application in the USB tab multiple times, each time you open that application in the USB tab an activity pack appears in the Table Content tab. The multiple activity packs in the Table Content tab contain only one application. If you delete the multiple activity packs, the application remains installed on the table.

- Sometimes an activity pack's title in the Now Open field includes the activity pack file extension, .tableContent.

SMART Table Toolkit issues
N/A

General issues
No change from previous release.
