SMART Board® 6075-V3 interactive display with iQ and Intel® Compute Card

Model SPNL-6375-V3

Overview

The SMART Board® 6075-V3 interactive display with iQ and Intel® Compute Card is the hub of your classroom. iQ technology connects devices, lesson content and pedagogically relevant software to create a cohesive educational experience. PC-free embedded computing provides one-touch access to a diverse suite of SMART applications—Notebook lessons, workspaces, gamification activities and whiteboard—and collaborative tools, such as wireless screen sharing and a web browser. There's no need for wires, cables or manual software and firmware updates.

Install an Intel Compute Card in the appliance to provide a fully functional Windows® 10 solution at your fingertips. Choose from three different compute card options to provide a consistent room-to-room Windows Full HD experience.

The 75" 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the two pens and write or draw over any application in digital ink.

Object awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and two users can write or draw at the same time.

See education.smarttech.com for more information.

As an ENERGY STAR® certified signage display, the SMART Board 6075-V3 interactive display meets strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and Department of Energy.
