# SMART Board™ Software Version 9.5 Toolbars
(Mac OS X Operating System)

Start Center Toolbar

The Start Center toolbar appears when you start your computer if you selected that option during the installation process. To access Start Center at any time, press the **SMART Board** icon in the Dock. The following buttons appear.

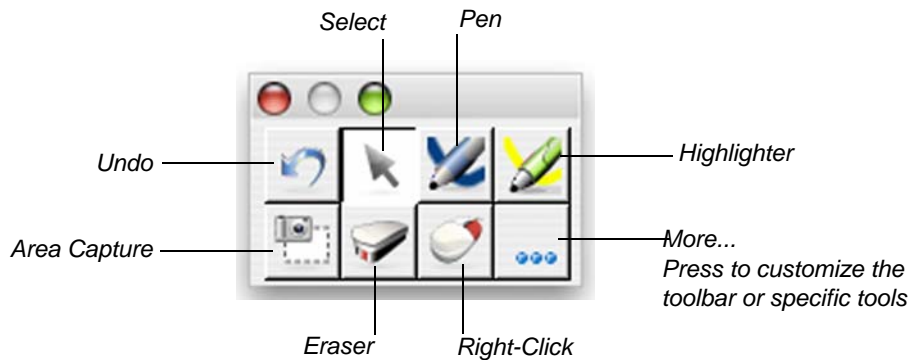

Customizing Start Center

You can add buttons that you use frequently to Start Center. Press **Configure Tools > Start Center Options** to open a dialog that displays the buttons you can choose. Drag any button to the Start Center toolbar to add it, or drag a button from Start Center to the dialog to remove it.
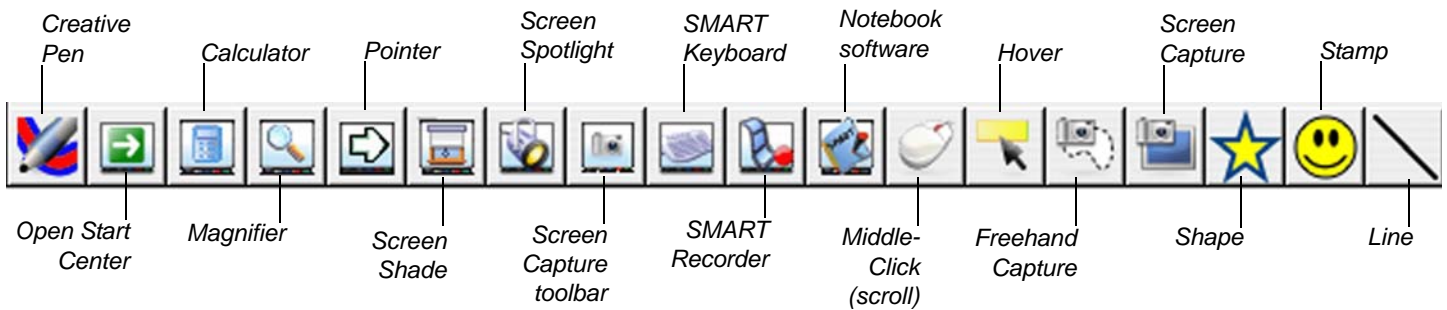

Floating Tools Toolbar

When you press the **Floating Tools** button in **Start Center** or select **Open > Floating Tools** from the **SMART Board Tools** menu, the Floating Tools toolbar appears.

Customizing Floating Tools

Press the **More** button in Floating Tools and select **Customize Floating Tools** to choose from a variety of toolbar buttons. You can choose as many buttons as you'd like to fully customize Floating Tools with the buttons you need. The additional buttons are:

You can also add certain buttons more than once. For example, if you want to use different shapes in your presentation, you can customize a number of Shape buttons and add them all to Floating Tools.
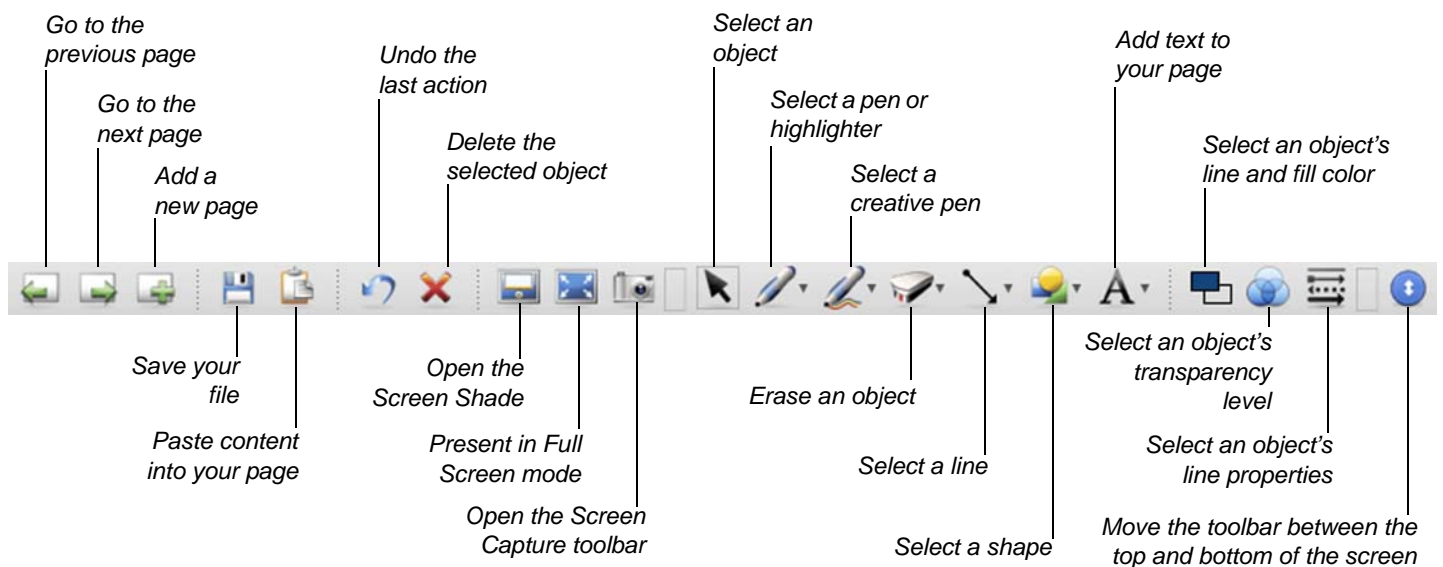

Screen Capture Toolbar

The Screen Capture toolbar is available from Floating Tools and Notebook™ software, and displays several options for capturing screen elements. All captured images appear on a Notebook page, where you can manipulate them as you would any other object. Select **Options** to customize this toolbar's icons, size and transparency, and to specify if you want the screen capture to appear on a new Notebook page.
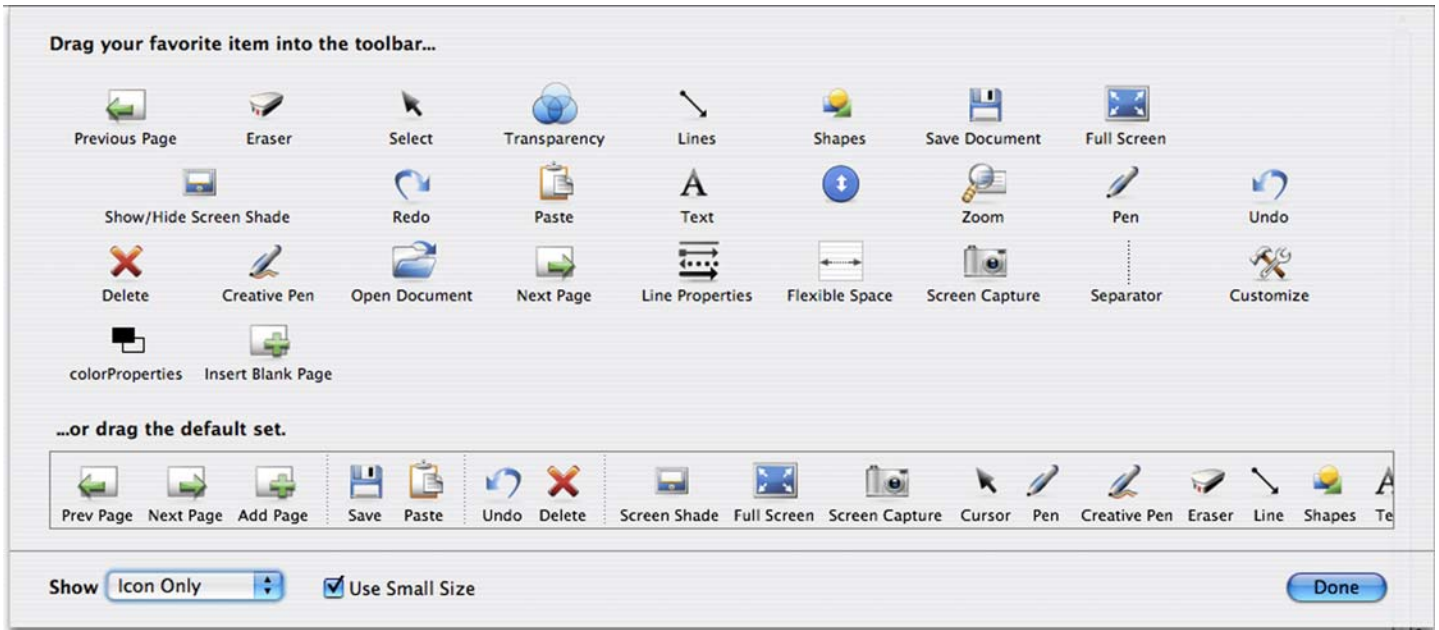

Capture any region of your screen

Capture a freehand area

Open the Options dialog

Capture the entire screen

Notebook Software Toolbar

You can find all the buttons you need to create, manage and present your Notebook files in a single, moveable toolbar.

Go to the previous page

Go to the next page

Add a new page

Undo the last action

Delete the selected object

Select an object

Select a pen or highlighter

Select a creative pen

Add text to your page

Select an object's line and fill color

Save your file

Paste content into your page

Open the Screen Shade

Present in Full Screen mode

Open the Screen Capture toolbar

Erase an object

Select a line

Select a shape

Select an object's transparency level

Select an object's line properties

Move the toolbar between the top and bottom of the screen
Customizing the Notebook Software Toolbar

If you Control-click the Notebook toolbar and select **Customize Toolbar**, the following dialog appears. Drag any button from the dialog to the toolbar to add it, or drag a button from the toolbar to the dialog to remove it. You can also drag buttons within the toolbar to change their position. Add separators and flexible spaces to organize the buttons.

The Full Screen Toolbar

When you press the **Full Screen** button in Notebook software, the whiteboard area is maximized, and the menus, tabs and title bar disappear. Use the Full Screen toolbar to navigate through your presentation, access menu options and return to the Normal view.

Move forward or backward through your Notebook pages

Access tools such as the Pen, Eraser, Highlighter, Screen Shade and New Page tool

Return to Normal view
