SMART Board® 7086 interactive display

Model SBID-7086

Overview

The SMART Board® 7086 interactive display combines a premium touch experience with the power of SMART Learning Suite, including SMART Notebook® software.

The 86" 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the four pens and write or draw over any application in digital ink.

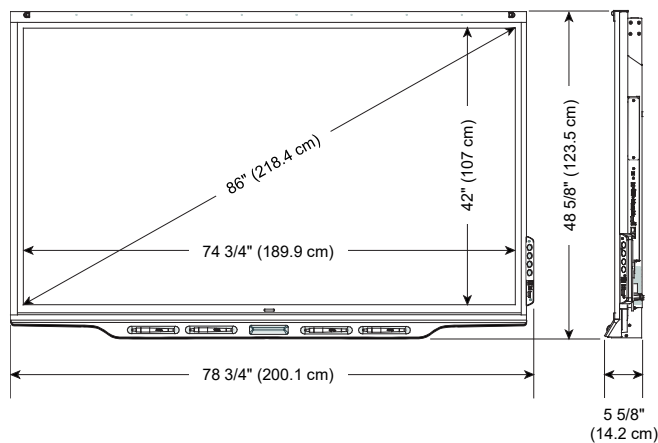

Object Awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and four users can write or draw at the same time.

See education.smarttech.com for more information.
