

Release notes

e³ experience software 2.x

Overview

The e³ experience software included with the new SMART Board® MX100 series interactive display features a digital whiteboard, screen sharing and a web browser. The interactive display has all the essentials educators need for bringing the devices students love into any learning environment. The SMART Board MX100 series is a great value for schools that need an interactive display on a budget.

e³ experience software 2.0.6.1

Release date	November 4, 2020
Software version	2.0.6.1
New feature	SMART Board MX165 interactive displays: You can adjust the display's color representation and picture quality by selecting either a warm or cool color temperature from Settings

e³ experience software 2.0.6

Release date	May 1, 2020
Software version	2.0.6
New features	<ul style="list-style-type: none">• The Browser app has been updated to Chromium 79.• You can configure the HDMI version for each HDMI connector as either HDMI 1.4 or HDMI 2.0. This allows you to connect HDMI 1.4 devices that are incompatible with HDMI 2.0 connectors and would otherwise appear as DVI devices. While viewing an HDMI input, you can configure its HDMI version through the display settings (Settings > Advanced > HDMI EDID version).
Resolved issues	<ul style="list-style-type: none">• Touch performance is improved, especially when you're writing quickly with a pen.• Adjustments have been made to improve the display's color representation and picture quality.• The behavior of the automatic brightness control has been improved so that it adjusts the display's brightness gradually when the room's ambient brightness changes.• An issue has been resolved that was causing Turkish content to appear when you set the display's language to Vietnamese.• An issue has been resolved that was causing no touch on an external computer when the display woke up.

e³ experience software 2.0.3

Release date	January 13, 2020
Software version	2.0.3
New feature	<ul style="list-style-type: none">• EShare app updated to version 7.0.0.927.
Resolved issues	<ul style="list-style-type: none">• Some text in Vietnamese menu appeared as Turkish.• Buttons on the front convenience panel and remote control did not respond after an extended period of time.• The display didn't respond to touch when waking up when the input was the e³ experience.• Resolved networking issues related to discovery advertisements with SSDP.• When the display woke up, the mute icon appeared even though the audio was not muted.
Known issues	The display may flicker when switching to the RGB input as the display determines the video source's resolution.

e³ experience software 2.0.1

Release date	October 3, 2019
Software version	2.0.1
New feature	<ul style="list-style-type: none">• SMART Remote Management software can report serial numbers for SMART Board MX100 series interactive displays.
Resolved issues	<ul style="list-style-type: none">• Improved touch accuracy near the edge of the screen when a computer is connected to the SMART Board MX165 interactive display.• A video's audio is no longer out of sync when playing the video.
Known issues	The display may flicker when switching to the RGB input as the display determines the video source's resolution.
